

**TESTEMONIAL FOR GARETH BEZANT OF HALCHAX**

I'm one of those people whom, when it comes to anything more than actually typing things into a computer is at a complete loss for what to do. Recently, my laptop got overrun by Windows 10. It caused problem after problem, not least, it prevented the laptop from receiving the wireless signal even though it knew it was there.

Gareth has worked tirelessly to remedy the problem. He's worked both remotely and had his hands on the throat of the machine. Tried this, that and the other and eventually found the remedy to make it work again.

At all times he and How Chan, have been polite, studious and always kept me informed of what is going on and how it will effect the laptop. They didn't give up when I had and others would have too.

I'd recommend Gareth and Halchax to my friends and family for any computer related needs, big or small.

Many thanks
