Testimonial for Gareth Bezant

As an authorised distributor for the Utility Warehouse Discount Club, my business is reducing the cost of essential services – specifically telephones, mobiles, broadband, electricity, gas and shopping – instore and online. My clients cover a broad range of households, businesses, professions and charities.

I am always looking for reliable professionals that I can recommend with confidence to my clients, family and friends.

My business is dependent on having reliable computer systems. Before I met Gareth, I was struggling to find computer support that was reliable and was available as and when the gremlins decided to strike my computer systems!

It has been such a relief for me to have Gareth's support and advice.

Gareth started by advising me on the upgrades and then Gareth did all the hard work for me in making those changes.

Since then, Gareth has been there every time that a gremlin has struck; for example, following a power cut, one of my printers refused to work. Gareth was there to support me.

It is a great pleasure for me to be able to rely upon Gareth and to recommend Halchax services.
